The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (instant pages 1 and 2) in view of Yan 7059868.

The admitted prior art substantially discloses the claimed invention except for the contact surfaces being coated with gold doped with cobalt or nickel, the gold having a thickness of around 5 micrometers and a purity of at least 97%, and the contact surface having a hardness of at least 80 HV. Yan discloses a gold coating 704 doped with nickel, and to provide the contact surfaces of the admitted prior art with such a gold-nickel coating thus would have been obvious, for better conductivity. The thickness and purity of the gold and the contact surface hardness would have been obvious matters of routine experimentation.

Applicant's arguments filed October 10, 2006 have been fully considered but they are not persuasive. It is true that Yan is silent regarding high currents. However, Yan is merely applied to show the obviousness of improving electrical conductivity and prevent corrosion by coating contact surfaces with gold, which is also desirable in the admitted prior art. Hence Yan is clearly analogous art.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
